

AJAX

What is Ajax

Ajax short for **A**synchronous **J**avaScript and **X**ML

Why use Ajax

When want to create client side to asynchronous web application

How to set Ajax

Add jQuery plugin

Ajax need to add jQuery plugin before set in client site

Add Ajax in client site

Path url Sent data Sent data type

Connection
Success function

```
$.ajax({url:"/emaildu", data:data, type:"POST",  
  success: function (result) {  
    console.log(status);  
    alert(result.status)  
    if(result.status == false){  
      alert('Duplicate user!!', result.status)  
    }else {  
      frm.submit();  
    }  
  }  
});
```

How to set Ajax

Ajax set in server site

```
router.post('/emaildu',function (req,res) {  
  console.log(req.body);  
  User.findOne({email:req.body.email},function (err,rtn) {  
    if(err) throw err;  
    console.log(rtn);  
    if(rtn != null){  
      res.json({status:false})  
    }else {  
      res.json({status:true})  
    }  
  });  
})
```
